

calomax

Catering water boilers for all your beverage requirements

Wide range of wall-mounted and
counter-top boilers for every
application, proudly made in the UK.

We offer a wide range of wall-mounted and counter-top water boilers, with unique energy-saving and health and safety features. These range from a 3-litre wall-mounted model ideal for a small staff canteen; to a 25-litre 9kW counter-top model, capable of supplying 681 cups in one hour.

New for 2011 is the stylish Eclipse range with Steritouch protection, energy-saving features and an easy-service functionality.

All our counter-top models are supplied with a complementary spill tray, and most counter-top and wall-mounted boilers come with a two-year warranty. All boilers incorporate integral scale-inhibitor technology, feature self-diagnostic service indicators, and have cool-to-touch outer casings.

Calomax boilers offer the following advantages:

Safety - High volume models are supplied with Dualflow taps; one fast-flow for filling teapots and urns, the other slow-flow to allow the safe filling of cups and mugs without the risk of splashing. Some models feature a unique key-controlled dispense system that allows you to restrict access to the boiling water.

Energy-saving - our boilers are well insulated and sealed. No steam escapes and the radiant heat loss is minimal. New models feature an additional economy function.

UK made they add less to your carbon footprint than imported models.

Long life expectancy - at least 5 years if properly maintained, the boilers afford a life-cycle costing that cannot be beaten.

Local service and back-up – immediate response to technical queries and requests for advice. Talk directly to our Service Manager – not a call-centre! Nationwide network of Service Partners.

Calomax is the only independent specialist manufacturer of catering water boilers in the British Isles, and we are proud to have supplied customers throughout the UK for the last 60 years. Our new range of eco-friendly “Eclipse” boilers will continue the Calomax tradition of offering robust, reliable, equipment, at competitive prices.

We hope that you will continue to favour us with your business.

Wall-mounted boilers

Eclipse 2W3

Brand new range of water boilers that put everyone else's in the shade! Ideal for small applications and where space is limited. This advanced boiler is eco friendly, as you can reduce the capacity by half at times when the use is lighter, thus saving on running costs. With a state of the art design and revolutionary handle which kills all bacteria on contact.

- UK made
- Steri-touch antibacterial protection
- Energy-saving function
- Extended warranty
- Built in scale-inhibitor
- Modern design
- Easy-service features

calomax

still flying the flag

For over 60 years Calomax has been manufacturing water boilers at our factory in Leeds. As well as the standard products shown in this brochure, we also make a wide range of "specials" - boilers for rail networks, oil-rigs, and ships at sea. If you have a bespoke requirement please let us know. If you would like some help or advice in choosing the best water boilers for your particular need - please give us a call.
