Also Available...

Home Office recommended model with a unique anti-ligature flushing rim which through manufacturing methods and design can guarantee a gap of no more than 1.9mm and can be secured to the floor as well as the wall of the building.

HDTX599

Universal prison unit

Manufactured from grade 304 stainless steel - satin polish finish. Material thickness 2.0mm, all welded construction. Suitable for installation with a duct wall ensuring all pipework is concealed. The WC can be positioned on the right hand side suffix (R), the left hand side suffix (L) or central to the unit suffix (M). A centre water outlet can be provided which needs to be connected to a pre-mixed water supply. The WC has been approved to BS EN 997 for 6 litre flushing performance.

Options:

Options available include Standard body (390mm) and wide body (500mm), Bolt fix or push fit, manual or electronic water controls, integrated cistern or direct flushing valve, the units can incorporate an access panel if required and the basin and WC waste can be connected for a single outlet.

Some of our most popular models are detailed below, however we can manufacture to your specific requirements.

Urinal flush controls

An intelligent solution to limit the waste of water in washrooms is available from Franke Sissons. A sophisticated automatic control system installed in minutes to give years of trouble free service, the urinal controller will significantly reduce water consumption and costs whilst maintaining the necessary high level of hygiene at all times.

Urinal controller system detects when the facility has been used, allows the cistern to fill which then flushes the urinal in the normal way.

An additional feature ensures that during long periods of inactivity, weekends and holidays, the urinal is flushed at least once every 12 or 24 hours as selected. In this way the hygienic flush keeps the urinals clean and fresh even when the building is unattended.

Water-free urinal

A new design of urinal trough, purpose made to maximise the flow to the waterless waste fitting and reduce standing fluids to ensure that the product is clean and odour free. Fitted with the unique waterless waste design and diaphragm, urinal slabs are ideal for locations such as stadiums, public houses, nightclubs, public toilets and factories where there is a high frequency of use.

The waterless waste fitting is based on a simple principle of a silicone diaphragm that allows urine to pass through the fitting but stops odours entering the washroom. The urinal does not need any liquids, gels, scented pads or components to be replaced on a monthly basis for the product to continue to work. The silicone diaphragm insert needs to be replaced at least twice a year, depending upon usage. The urinal slab is made from 1.5mm grade 304 stainless steel and is secured with wall brackets and top edge fixings. The plastic waste fitting is 38mm without the need for a conventional bottle trap.

L or R after the code refers to the handing of the waste outlet when facing the unit.

Before / After use

How it works

The waste systems used in our stainless steel water-free urinals contain a silicone diaphragm that allows urine to pass through the waste, then creates a seal to stop odours entering the washroom.

The cartridge containing the silicone membrane is locked in to the waste using the maintenance key, the cartridge will only require changing twice a year even in the most heavily used washrooms.

ITEM NUMBER

Cadet glass fibre reinforced plastic urinal

The Cadet's smooth, rounded shape with no screws or grooves, makes it easy to clean. Glass fibre reinforced plastic is more resilient than ceramic, benefits from a long life cycle and provides a high level of security against vandalism. The centrepiece of the water-free urinals is the odour trap: This odour trap works with the aid of a special blocking fluid. The blocking fluid needs replacing after approximately 5000-7500 uses. Urinal supplied complete with mounting brackets, maintenance tools, 300ml Urilock and a Uricloth.

Crew glass fibre reinforced plastic urinal

The type Crew is ideally suited for use in places where large numbers of people congregate. The Crew is available in three different lengths (120, 180 and 240 cm) and helps to ensure that both the waiting times in toilet queues are kept to a minimum during busy periods and that the water costs are reduced. Glass fibre reinforced plastic is more resilient than ceramic, benefits from a long life cycle and provides a high level of security against vandalism. The centrepiece of the water-free urinals is the odour trap: This odour trap works with the aid of a special blocking fluid. The blocking fluid needs replacing after approximately 15000-20000 uses. Urinal supplied complete with mounting brackets, maintenance tools, 300ml Urilock and a Uricloth.

How it works

The waterless Uridan® urinals are more hygienic than conventional flushing systems. The centrepiece of the Uridan® urinals is the odour trap: This odour trap works with the aid of Urilock®, a special blocking fluid. Urilock® consists of plant-based substances and is biodegradable. The heavier urine flows directly down the drain, whilst the lighter Urilock® stays on the surface and blocks out odours. Just one Uridan® urinal saves up to 200,000 litres of water per year.

Eco-Airblast Maxi 'hands in' dryer

The Eco-Airblast Maxi is a warm high speed 1750W 'hands in' dryer using sophisticated air curtain technology that dries hands in 10-12 seconds. No heating element as it cleverly recycles heat from the motor to generate warm air. Made from ABS polycarbonate and a noise level of only 69dB it's a must for any commercial washroom. Includes built in water tank. Touch free operation. Optional HEPA filter captures 99.9% of airborne bacteria and Puretab tablets can be used to control odour and prevent sludge build up in the drip tray.

Accessories

Miranit Bespoke Choices

Our new bespoke range of washbasins are custom made sanitary solutions for commercial installations.

Three different bowl shapes can be seamlessly moulded into a strikingly graceful washbasin top with a material thickness of just 18mm or 25mm and up to 3.6m in length. There is almost no limit to the variation of ideas; flexible washbasin length, a choice of bowl shapes, number of bowls and bowl spacing. The different designs with or without tap landing also provide the opportunity to include a wide range of fittings to obtain the chosen result. You can even choose from two different materials.

Material Choice

White with Gelcoat surface

Made from 80% natural minerals and approximately 20% high quality unsaturated polyester resin. The core is surrounded by a pore-free smooth high gloss Gelcoat layer.

- Hygienic surface finish which is temperature resistant up to 80°C
- High gloss Gelcoat layer
- Easy to repair and clean
- Durable and fracture proof
- High stability with low material thickness

Solid matte

Made from 2/3 aluminium hydroxide (ATH) and 1/3 polyester resin and the same colour all the way through, the matte material offers a high level of scratch resistance.

- Easy to repair and clean
- Durable, fracture proof and scratch proof
- High stability with low material thickness
- Material coloured all the way through

Other Options

- Number of bowls
- Distance between bowls
- Length of washbasin
- Depth of washbasin
- With or without raised back edge
- Apron height
- With or without tapholes

Accessories Available

- Soap dispenser
- Towel holder
- Paper towel dispenser
- Waste disposal barrel
- Waste disposal flap

WASHBASINS AND WASHTROUGHS

MIRANIT CHILDRENS WASHTROUGH

IMAGE

TYPE/MODEL

ITEM NUMBER

MIRANIT children's wash and play trough

Our WASHINO wash and play troughs are available for 2, 3 or 4 users.

The playful wave and pleasant warm surface of the MIRANIT material are a temptation for children to wash their hands.

The larger outer radii of the mineral granite made basins reduce the risk of injury, whilst the generous inner radii and their seamless design make cleaning the washtroughs an easy task.

The non-porous, high gloss hygienic surface (temperature-resistant up to 80°C) in conjunction with a high resistance to impact and abrasion, emphasises how well these wash and play troughs are suitable for everyday use.

All models are supplied with a waste and overflow as well as a tap hole for each wash place, integrated basin back panel and mounting material to make mounting easy.

Washtroughs

Made from Miranit resin bonded mineral material, with an alpine white gelcoat surface finish that's smooth, pore-free and temperature resistant up to 80°C. Washtroughs include a 32mm waste kit with overflow and tap deck with integral back panel and fixing kit for ease of installation.

Available with 2 tapholes for 2 users (1200mm) or 3 tapholes for 3 users (1800mm) and with or without splashback. There is also a choice of either self-closing or electronic, touch free taps with both models.

Other modifications such as the inclusion of deck mounted soap dispensers, without overflow and without tapholes are available if required. Please ask us for more details.

2 users – 1200mm x 480mm

ITEM NUMBER

Semi-circular and circular washtrough

Designed to be highly durable and water efficient and to withstand intensive use in busy environments, the semi-circular and circular washtroughs are particular vandal resistant. Products are available for up to 8 users with a choice of touch free infra-red controls or manually operated self-closing taps, designed to save water and energy with adjustable flow time. Both tap options are available with soap dispensers. Semi-circular troughs are for mounting up to a wall and for duct mounted or floor supply services. The large floor mounted base for the circular troughs provides good stability. Services are fed from below and can be accessed through a side panel which are fitted with tamper proof security screws. The use of a single water supply and waste has a significant cost saving compared to conventional washbasins which need a water supply and waste for each basin. Delivered fully assembled. Junior height version also available.

WUDU WASHING STATION

IMAGE

TYPE/MODEL

ITEM NUMBER

WUDU/ABLUTION WASHING STATION

It is mandated by the holy Quran that every muslim should perform an ablution or must clean oneself with clean water before performing salat (prayer). Wudu (Ablution) literally means preparing yourself for prayer by cleaning yourself.

Franke Sissons have developed the perfect solution with its Wudu Washing Station.

WASHBASINS AND WASHTROUGHS

Wudu washing station

1 or 2 person wudu/ablution washing station made from 1.5mm 304 stainless steel, with a satin polish finish. Fitted with self closing tap(s) and a 2inch domed waste. Incorporates a hinged grid to aid foot washing and easy cleaning. Access panel at the front to enable easy access to waste and plumbing. Seats are available as an extra.

L or R after the code number refers to the handing of the waste outlet when facing the front of the wash station.

| | |
|--------------------------------|--------------------|
| Wudu 700mm with 1 manual tap | WUDU0700L/R |
| Wudu 1200mm with 2 manual taps | WUDU1200L/R |

Bespoke lengths are also available, along with electronic sensor controlled taps and soap dispensers. Please ask for details.

Franke chilled drinking fountain wall hung

The water coolers and drinking fountains from Franke offer a low maintenance and reliable solution where chilled drinking water is required in commercial buildings. Available with or without a bottle filler, the products are connected direct to the water mains supply and supply an unlimited amount of chilled water which always has a fresh taste. The product requires 240V main electrical supply via a 3 pin plug socket.

The coolers are made from durable coated steel panels.

The products are provided with a chlorine based water filter as standard and this is recommended to be replaced every 6 months. Replacement filters are available from Franke Sissons.

An installation kit is included.

HTM STANDARD 64

DUH hospital pattern disposal sink

A DUH hospital disposal unit manufactured from 1.2mm thick, grade 1.4301 (304) stainless steel with a satin polish finish. The top is turned down on all four edges and incorporates a wet area recess. Fitted with a sluice hopper at one end which can be supplied with either top inlet or back inlet. The hopper has a 110mm dia. outlet which can accept a P or S trap, available as an extra.

Stainless steel cisterns are available with stainless steel downpipes for surface mounting installations. For installations where the cistern is duct mounted a plastic cistern with plastic downpipe is available. Plastic cisterns have a 9 litres capacity whereas the stainless steel cistern can be 6, 7 or 9 litre capacity and all are fitted with a 13mm HP brass valve, plastic float and CP metal flushing lever handles. The unit should only be fed from a cistern or tank water supply.

Unit can be mounted on either stainless steel cantilever brackets or stainless steel front leg supports. Front leg supports give a working height of 900mm and have adjustable feet which can be screwed to the floor for extra stability.

L or R after the code number refers to the handing of the drainer ie. left or right when facing front of unit.

Magnum catering sinks 700mm wide with 610x460mm bowl

Magnum sinks are manufactured from 1.2mm thick austenitic grade stainless steel polished to a satin finish. Bowls are all supplied with 38mm waste and standpipe strainer overflow. All sinks have two tapholes behind each bowl drilled at 180mm centres. Single bowl sinks are suitable for either 13mm pillar taps or mixer taps whereas the double bowl sinks are only suitable for pillar taps. An earthing lug is fitted under the drainer. Stainless steel underframes complete with shelf are supplied in a flat pack form with easy to read assembly instructions. Each leg is fitted with an adjustable foot (-20/+10mm) with a working height of 900mm.

L or R after the code number refers to the handing of the drainer. ie. left or right when facing the unit.

Magnum catering sinks 700mm wide with 760x510mm bowl

Magnum sinks are manufactured from 1.2mm thick austenitic grade stainless steel polished to a satin finish. All sinks have two tapholes behind each bowl drilled at 180mm centres. 19mm pillar taps are required to provide sufficient flow of water for the large sink bowls. Bowls are all supplied with 38mm waste and standpipe strainer overflow. An earthing lug is fitted under the drainer. Stainless steel underframes complete with shelf are supplied in a flat pack form with easy to read assembly instructions. Each leg is fitted with an adjustable foot (-20/+10mm) with a working height of 900mm.

L or R after the code number refers to the handing of the drainer. ie. left or right when facing the unit.

Sink pillar taps

A range of pillar taps, with varying handle design to suit specific applications where appearance or ease of grip are a relevant selection criteria. All of the pillar taps are manufactured from chromium plated brass. F1035 and F1036 (19mm connections) are ideal for the larger sink and they have crosshead handles which are more appropriate for use when the hands are wet, whereas the F1081 (13mm) and F1083 (13mm) are suited to smaller sinks and are fitted with crosshead and fluted handles respectively.

Wall shelves

Manufactured from 1.2mm thick grade 1.4016 (430) stainless steel polished to a satin finish. All the shelves have integral triangular shaped wall brackets at each end. The brackets incorporate 2 fixing holes and together with the fixing holes provided in the upstand make for a strong and durable fastening to the wall. (Screws and plugs are not supplied). Ensure that the correct fixings are used to suit the type of wall. Additional loose fitting brackets are supplied for extra strength.

Microwave shelf

Manufactured from 1.2mm thick grade EN 1.4301 (304) stainless steel polished to a satin finish. Two triangular wall brackets are supplied with each shelf, which fasten to the shelf using two nuts and bolts supplied. Once the brackets are attached they are then screwed to the wall using the correct screws and plugs to suit the type of wall (screws and plugs are not supplied). The shelf can either be supported from underneath or alternatively hung from the brackets, depending upon the installation and size of the microwave. The brackets can also be positioned so that a 20mm gap at the rear can be left for the passage of cables. Fixing instructions are provided with each shelf.
